BANFF

World-famed Winter Sports Centre

Situated in the very heart of the Canadian Rockies, a mile above the sea, Banff is unrivalled for its winter sports facilities. Here ice and snow conditions remain ideal throughout the winter and good skiing is available until mid-May.

Radiating from Banff are trails to all ski-camps. Mount Norquay Camp, reached by a good motor road, is only three miles from the hotel. Here equipment may be rented and beginners secure tuition from professionals at moderate cost. The more experienced can make arrangements to visit the higher altitude camps, such as Sunshine, Skoki or Assiniboine.

In addition to skiing, all other winter sports are available: Skating, Curling, Sleighing, Tobogganing, Snowshoeing, Ski-joring, etc.—these briefly outline Banff's recreational possibilities, while in contrast bathing may be enjoyed in the famous Hot Sulphur Springs.

The Big Event of the season is the Banff Winter Carnival, held annually in February, when contestants from far and near assemble to match their skill and speed in all forms of winter sports.

Banff, midst its snow-clad rugged grandeur, is to North America what St. Moritz is to Europe. If interested, you are cordially invited to write for full information to

Columbia Icefield

THIS BREATH-TAKING TRIP of indescribable scenic grandeur, penetrates the very heart of the Canadian Rockies, and embraces that vast section between Lake Louise and Jasper, previously only accessible by pack-train and at considerable cost.

Some of the numerous points of interest on the tour are: Hector Lake and Mt. Hector (11,135 ft.); Bow Lakes; Crowfoot Glacier; Peyto Lake and Glacier; Waterfowl Lakes; Howes Peak (10,800 ft.); Mt. Amery (10,904 ft.); Mt. Murchison (10,936 ft.); Saskatchewan Glacier; Mt. Athabasca (11,452 ft.); Mt. Walley (11,170 ft.); Diadem Peak (11,060 ft.); and of special interest—the Snow Dome, a peak of 11,340 feet in height, still completely clad in solid glacial ice which dates back to the Ice Age. This peak is the very apex of the Continent, for from its glaciers, which are a part of the Columbia Icefield, rivers are born which flow to three oceans—the Athabasca to the Arctic, the Saskatchewan to the Atlantic and the Columbia to the Pacific. The climb to the summit is not too difficult for the inexperienced mountaineer, and what a thrill it is to really sit "on the top of the world."
